Insulating Tape E17385

Guide Information

3M COMPANY

ELECTRICAL MARKETS DIV (EMD), 13011 McCallen Pass Bldg C, Austin TX 78753

1350FY-1 (b)

Polyester film/mat composite insulating tapes

Color	Temp (°C)	Functional Use +	CTI ASTM D3638	CTI IEC 112	Exposed Side
Yellow	130	A, C, D, E, J	1\1	II\II	Adhesive\Film

A - Tape is used as a dielectric insulator (in dry locations)

C - Tape is required to demonstrate resistance to electrical surface tracking due to the combined effects of electric stress and surface contamination

D - Tape to tape (backing) adhesion provides sole means of securement to maintain position and/or spacings

E - Tape to steel adhesion provides sole means of securement to maintain position and/or spacings

J - Tape is used in applications where flammability is a concern

(b) - May be marked "Comparative Tracking Index (CTI)) equal to or greater than 400V but less than 600V, UL840 Material Group II, when tested to IEC60112 on both sides of tape"

\+ - See the Guide Information for alphabetical end-use Functional Use codes.
